ABOUT ME

I am a Computer Science and Engineering student with a specialized focus on Cloud Computing and DevOps Engineering. Proficient in Python and infrastructure logic, I am dedicated to learning modern DevOps practices and cloud-native systems for future scaling. I am a detail-oriented problem solver and collaborative team player, committed to building scalable, high-quality technical solutions.

EDUCATION

B.E Computer Science and Engineering

2023 - 2027

Sathyabama Institute of Science and Technology

Currently pursuing Computer Science and Engineering at Sathyabama Institute of Science and Technology.

Higher Secondary Studies

2021 - 2023

ZION Matriculation Higher Secondary School

Completed Higher Secondary education with a focus on Mathematics and Computer Science. Developed a foundational interest in software logic and creative technology.

SKILLS

- Programming Languages: Python, Bash, React
- Version Control: Git, GitHub, GitHub Actions
- Containers & Cloud: Docker, Microsoft Azure

PROJECTS

Multimodal AI Supply Chain Analysis

02/2026 - 04/2026

Developed a situational awareness application to detect supply chain disruptions by fusing real-time traffic, weather, and social media data.

Tech: React, Python, GitHub Actions.

Interactive Developer Portfolio Platform

03/2026

Engineered a high-performance Next.js portfolio platform featuring interactive 3D particle systems, a custom skill orbit visualizer, dynamic modal projections, and automated CI/CD deployment pipelines.

Tech: Next.js, React, Tailwind CSS, GitHub Actions.

Smart Rental Tracking System

08/2026

Developed an end-to-end telemetry and fleet intelligence portal for heavy machinery tracking, combining real-time IoT signal streaming, predictive maintenance modeling, and 3D digital twin rendering.

Tech: React, Node.js/Express, Three.js, Tailwind CSS, Python

HONORS

ChallengeX Winner | George Mason University

02/2026 - 04/2026

- Achieved 2nd place in an 8-week high-impact hackathon focused on solving real-world federal and private sector challenges.
- Developed specialized solutions for Supply Chain Situational Awareness (CNA).
- Co-engineered production-ready prototypes and multimodal AI architectures within a multidisciplinary team.

Caterpillar Hackathon Winner | Sathyabama Institute of Science and Technology

8/2026

- Secured 2nd place in a high-intensity 24-hour university hackathon conducted by Caterpillar.
- Built and demonstrated a functional Smart Rental Tracking System featuring automated alert routing, AI health insights, and operational KPI dashboards.
